Smaller country road
Initial minor highway, Weighing rules on minor highway, Railroad crossing

Ida Wikström

Remember to keep a low speed around the corner so you can more easily see when you are straight in the mirror. Keep a good eye on the car during the entire reversal, do not forget starting routines when starting from the roadside. Keep practicing at home :). Godkänd

Ida Wikström

Continue to work on minor country roads at home to improve speed adaptation and maintain a steady speed.

Remember not to look at the edge so you end up too close to it. Continue braking when shifting downhill and brake earlier at decelerations. Godkänd

City

Weaning rules in city, Introductory city

City

Traffic signal, One-way street, City turn-off rules, Initial city

Ida Wikström

Always plan so you choose gear according to the view. You must clearly show which rule applies and that you intend to apply it. Be clear with your placements at intersections.

Do not stress in a left turn in traffic lights.. Godkänd

Smaller community

Weighing rules in smaller society, Introductory smaller society

Ida Wikström

Make sure to start on time so you have time before the intersection. Avoid stress as much as possible, the planning will be better without the stress. If you are unsure whether you have good or bad visibility, remember that it is always okay to slow down and shift down so you have time to stay soft if you have to. Remember to always look in the mirrors and blind spot before turning and position yourself so it is clear where you are going.

Operation

Reversing, Turning, Parking, Turning and parking in the city

Ida Wikström

Look earlier at the roundabouts so you can more easily plan your entrance. If you do not see the other cars giving signs, try to check how they have the wheels set and where they are going. Keep practicing more on parking at home, make it easy for you only when you park or need to adjust a parking space.. Godkänd

High speed road

High speed road

Ida Wikström

Continue to work on driveways on the highway. We drove the southbound highway. Towards Stockholm, exit towards Bredsand, exit again Stockholm and then exit towards Nolby. In Nolby we turned and drove towards Sundsvall again, exit towards Bredsand, entrance towards Sundsvall again and then we went over the bridge to the exit towards the hospital and followed the signs. Remember not to brake before the exit. Soft steering wheel movements when changing lanes or overtaking.. Godkänd

Ida Wikström

Keep in mind the basic location when there are several lanes in the same direction. Be kind to yourself if something goes wrong, it's better you let it go and focus on the other.. Godkänd

Education control

Education control

Ida Wikström

Remember the basic location to the right if there are two lanes in the same direction. Remember to slow down when you park so you can more easily see how you end up in the parking lot, if you need to adjust it's okay just make it easy for you. Nice planning against right-wing rules. Remember to keep the pace up on the highway, it will be dangerous if you keep too low a speed.

Worked with a softer footwork. Not always having to downshift to 1st, sometimes you can creep on 2nd gear too... Visibility, speed, gear... Have a plan A and a plan B! You can solve most things in city traffic as long as you search and plan in time. Careful with the placement, eg in circulation and in the lane.. Approved
